Association Membership Criteria: Qualified PI, Honorary, Foreign PI, PI Students.

Comments on Association Activities, if any: ADPPP Professionals Association of Private Detectives of Portugal , is an association of national and international scope , has legal personality and nonprofit.

The main objectives of ADPPP are gathering qualified professionals , representing them in a dignified way and deserving of the support of government authorities and other public entities.

To publicize the advantages of this activity, when performed by true professionals.

Inculcate among its members a spirit of cooperation and mutual trust.

Create and develop training courses in the field of private investigation.

In Portugal the activity of private detective is registered in Diário da República, since the year 1995 and also in CAE ( Notebook of Economic Activities ) , but still without proper regulation. ADPPP has made efforts with government agencies in order to obtain the appropriate regulations for the activity of private detective. The various meetings we have ever had in the Ministry of Internal Affairs , with Secretaries of State and their Minister , obtained the promise of analysis to ensure proper regulation.

Until this date there has not been a decision. We still continue to expect a positive response.

Total No. of Members: 23
